DETAILED ACTION

Response to Arguments

1. Due to applicant's amendments, the objection to the specification and rejections to claims 1-12 under the second paragraph of 35 U.S.C. 112 in the previous office action are withdrawn.

2. The amendments to claims 1-20 filed on 1/14/2009 are acknowledged. Applicant's arguments are fully considered. New objection to the specification and rejections to amend claims 1-20 under 35 U.S.C. 112 are set forth in this office action.

Specification

3. The disclosure is objected to because of the following informalities: the abstract contains more than 150 words.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an electrophoretic method for producing fully ceramic tooth elements, does not reasonably provide enablement for conducting all/any kinds of electrophoresis. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The instant specification provide enablement

Art Unit: 1795

for an electrophoretic method to deposit ceramic materials for producing fully ceramic tooth elements, but does not provide enablement for an electrophoretic methods to deposit material rather than ceramic, such as electrophoretic deposition of paint for producing protected coating on an object. Therefore, the claimed subject matter cited claims 1-20 are broader than the written description disclosed by the instant specification.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As recited in claims 1 and 20, the limitation “framework material” constitutes an indefinite subject matter because it is not clear what the applicant regard as “framework material” and the instant specification does not provide clear definition of this term. Therefore, appropriate correction is required. For the purpose of examination, “framework material” is interpreted as “ceramic material”. Claims 1-19 are rejected because of their dependency and failure to remove the ambiguity of parent claim.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
